***Claim Rejections - 35 USC § 102***

Claims 24,25,26 and 29-33 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Minetti.

Looking at Fig. 2, the first inner surface is where the top run of cord 9 is located, which defines a "channel", the second inner surface, defining the through bore is where the cord goes down, between pulleys 12 and 8, and third inner surface, defining the slot, is where the bottom horizontal run of cord is recessed in the body member. The first side is the left side, the second side is the right side, the third side is the bottom side and the fourth side is the top side, which is not planar since it has the channel located therein. For the purpose of meeting claim 29, the fourth side may also be interpreted as being the side that has hook 20 and element 10.

***Allowable Subject Matter***

Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
